Dear Sir/Madam,

APPLICATION LETTER

If your organization is in need of a graduate who finished with a very good degree at the Undergraduate level, someone who is good at observing information, analyzing problems, making objective decisions and coming up with creative innovations, then it is beneficial that we meet. Therefore, I would like to present my CV and qualifications for your review.

I have a Bachelor's Degree in Computer Science with a CGPA of 4.10 out of a possible 5.00. I am currently working for Guaranty Trust Bank where I work with the team that handle its IT payments and collaborations.

I've previously worked in Eden Global Group, an Intern in Avitech Nigeria and FAAN Murtala Mohammed Airport where I developed more effectively some key skills (e.g analytics, excellent communication, ability to work as a team amongst others) to help me in future endeavors.

My self-driven motivation, confidence, willingness to learn and ability to understand what is being disseminated with a high degree of assimilation, are additional abilities that would do a lot in helping me perform effectively at your firm.

My CV would provide additional details regarding my background and qualifications. I would welcome the opportunity of a personal interview so we could discuss your organization's top priority needs and the performance you can expect from me in addressing those needs.

Sincerely,
Olushola Ajayi
